

Google Sheets Tips & Tricks

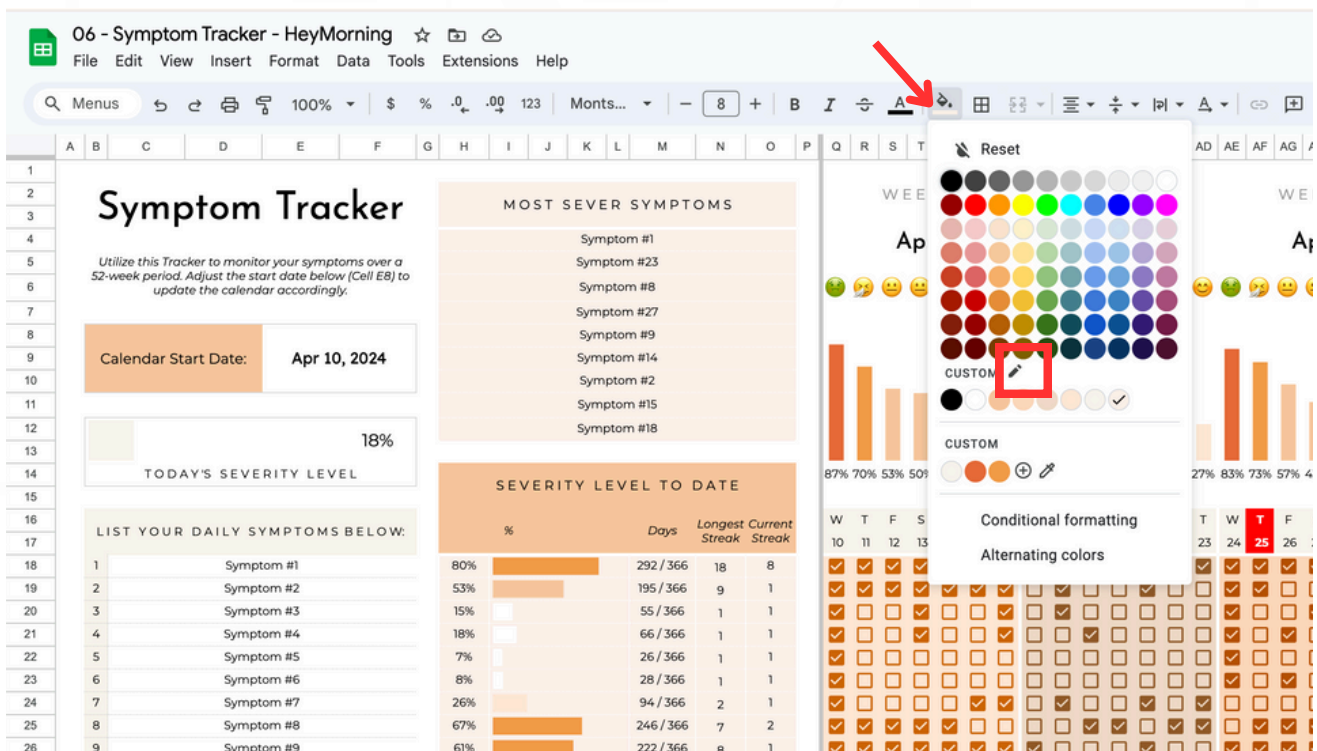

Below you will find a selection of tips and tricks for using our spreadsheets on Google Sheets!

Changing the colors of your spreadsheet

We have setup almost all of our spreadsheets to allow you to change the colors of your spreadsheet in just seconds. Changing the colors will allow you to customize the spreadsheet more to your liking! All you will have to do to change the colors is to change the theme colors. Currently Google Sheets only allows you to change the theme colors in the browser version of Google Sheets.

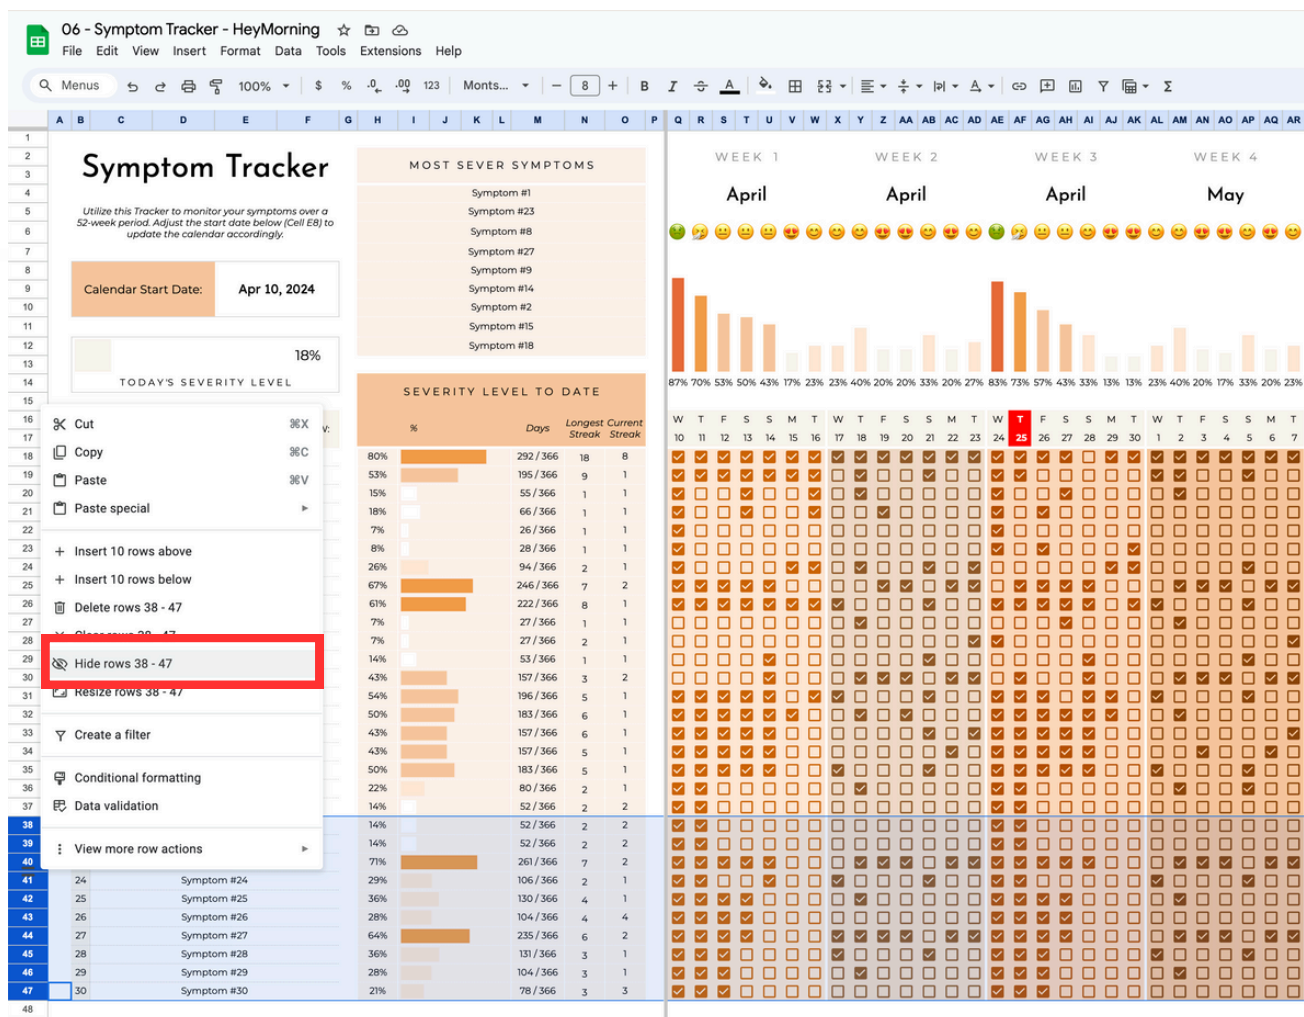

To change your theme colors:

- Click on the paint bucket tool in the tool bar
- Next to the word “Custom” you will see a pencil icon
- Click on the pencil icon
- You will now be able to change the theme colors, changing them here will update them in the whole spreadsheet

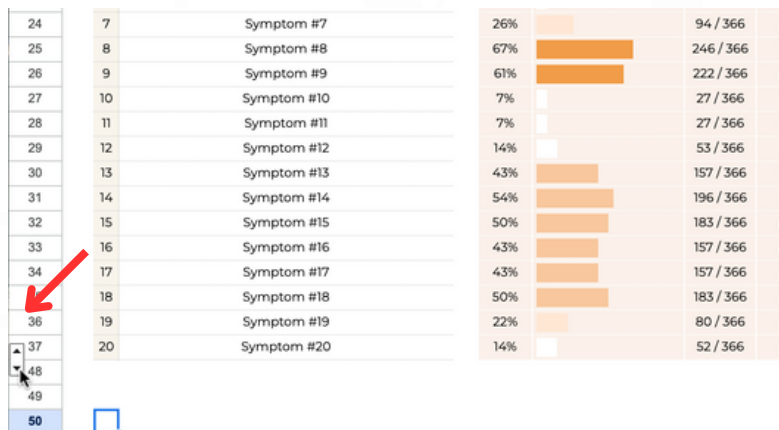

The screenshot shows a Google Sheets spreadsheet titled "06 - Symptom Tracker - HeyMorning". The toolbar at the top includes a paint bucket icon, which is highlighted by a red arrow. The "Custom" color palette is open, displaying a grid of colors and a pencil icon next to the "CUSTOM" label. The spreadsheet content includes a "Symptom Tracker" title, a "Calendar Start Date" of "Apr 10, 2024", a "TODAY'S SEVERITY LEVEL" of "18%", and a "LIST YOUR DAILY SYMPTOMS BELOW:" section. The "MOST SEVER SYMPTOMS" section lists symptoms #1, #23, #8, #27, #9, #14, #2, #15, and #18. The "SEVERITY LEVEL TO DATE" section shows a table with columns for percentage, days, longest streak, and current streak. The table data is as follows:

	%	Days	Longest Streak	Current Streak
1	80%	292 / 366	18	8
2	53%	195 / 366	9	1
3	15%	55 / 366	1	1
4	18%	66 / 366	1	1
5	7%	26 / 366	1	1
6	8%	28 / 366	1	1
7	26%	94 / 366	2	1
8	67%	246 / 366	7	2
9	61%	222 / 366	8	1

Your rows are now hidden, to unhide them just click on the two little black arrows that are visible in the row bar. Hiding rows can also be useful for those who want to create a more compact overview on their budget tab, or, for example their payment planner or annual overview tab.

Access & Share Your Spreadsheet

Share it with Us

If at any point in time you are experiencing issues with your spreadsheet, or for example, deleted formulas that alter the function of the spreadsheet be sure to contact us on Etsy. If your issue is specifically related to your spreadsheet be sure to include a link to the spreadsheet so we can assist you straight away:

- Click on the “Share” button in the top right corner
- In the bottom click on “anyone with a link” and most important “editor”
- Click copy link and send it to us in the Etsy chat, as well with a description of what issue you are experiencing

After we have had a look at your spreadsheet, and possibly restored the sections that are not functioning, you can change it back to restricted so we won't have further access. We will always do our best to get back to you within 24 hours.

Access Your Spreadsheet from Multiple Devices

If you would like to access the spreadsheet with multiple Google Accounts, for example because you would like to share your budget with your partner. Take the following steps:

- In the top right corner of the spreadsheet you will see a big green “Share” button, click it.
- In the bar that says “add people or groups” type in the email address of the person you would like to share the spreadsheet with
- Pick what kind of access you would like to give the person you would like to add:
 - Viewer: the person can see the data in the spreadsheet but not make any changes
 - Editor: The person can view the spreadsheet and make changes
 - Owner: the person can view, edit, and has the option to now remove you from the spreadsheet
- Click on the send button

Access Your Spreadsheet from Multiple Devices

While we recommend opening the spreadsheet for the first time on your computer or laptop, there are no restrictions on which devices you can open or edit your spreadsheet. If you would like to access your spreadsheet on your tablet or phone we highly recommend downloading the Google Sheets app (available for [Android](#) and [Apple devices](#)) to make accessing the spreadsheets easier.

Make Your Spreadsheet Available Offline

While you will need an internet browser to edit your spreadsheet, Google Sheets has made it possible for you to edit and access your spreadsheet offline. You can find more information regarding using and editing your spreadsheet online on the [Google Docs Help Platform here](#).
